Adapting to Rising Tides Planning Process **IMPLEMENT** Society & Equity Environment Economy Governance **SCOPE & PLAN** ORGANIZE 5. Identify Issues ASSESS DEFINE

Recall...

Outcomes of Step 4-Summarize Findings

- Assessment findings summarized into clear, outcome-oriented vulnerability and consequence statements
- Profile sheets that have been shared with and reviewed by the working group

Now onto...

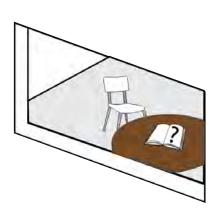

for the profile sheets

issue statement

A concise description of the issues associated with impacts to an asset, sector or service, including the primary causes of vulnerability and likely consequences.

A short "story" of an asset's climate impacts vulnerability and consequences.

 Identify the project key planning issues

key planning issues

Issues that require collaborative planning by working group members and others to develop adaptation responses

key planning issues

- ... are often caused by vulnerabilities that:
 - Cut across multiple assets, jurisdictions or geographies
 - Have significant or early consequences

- Require coordinated decision-making or funding
- Require regulatory changes to solve

 Refine project resilience goals, if necessary, based on the findings of the assessment

Developed in Step 1-

project resilience goals

Goals that define desired outcomes of a climate change planning effort. They are a foundation for future project decisions.

 Develop adaptation responses
